- Model: UH-19XR-SAR-135

The 19XR Rescue features a large open deck that can be customized for a variety of search and rescue or cargo applications. An Ideal craft for rescue in areas where other craft cannot go. Many times of the year ice hampers rescue attempts when it is too thin for snowmobiles or too thick for boats. The 19XR Rescue is designed to allow two litters and still have room for gear and rescue personnel.
